

**Hawaii Energy Utility Regulation and Taxation
Practice, Policy and Incentives for
Energy Efficiency, Renewable and Distributed Energy Resources**

Carl Freedman and Jim Lazar

The primary objective of this report is to provide the Hawaii Energy Policy Forum and Summit with background, analysis and a selection of options that could serve as a basis for making recommendations to the 2004 Legislature.

The full report addresses the Hawaii government's role in directing the future of utility energy production and consumption. Particular emphasis is given to the consideration of energy efficiency, renewable and distributed energy resources. The consulting team was directed to determine the status of Hawaii's energy regulatory agencies and how the functions of these agencies could be improved, either by incremental changes or by substantial reforms. To meet these objectives the report focuses on identifying issues and providing a palette of recommended actions and options for consideration as follows:

- How does government regulate and tax energy production and use?
- What incentives does government provide to energy producers and users?
- Are these incentives consistent with the state's energy policies? and most importantly,
- What actions can be taken to improve the regulation and taxation to further the objectives of Hawaii's energy policies?

The report provides an extensive list of specific actions, options, alternatives and recommendations in the following areas:

- THE ROLE OF GOVERNMENT IN IMPLEMENTING ENERGY POLICIES
- THE FATE OF HAWAII'S UTILITY ENERGY EFFICIENCY PROGRAMS
- IMPENDING TURF WARS: COMBINED HEAT AND POWER INSTALLATIONS
- IMPROVING ENERGY REGULATION IN HAWAII
- NEED TO STRENGTHEN THE UTILITY REGULATORY AGENCIES
- IMPROVING PUBLIC ACCESS TO THE REGULATORY PROCESS
- THE CONFLICTING ROLES OF THE DIVISION OF CONSUMER ADVOCACY
- UTILITY RESOURCE EVALUATION AND SELECTION
- UTILITY RESOURCE PROCUREMENT
- ALIGNING RATE DESIGN WITH ENERGY POLICIES
- ALIGNING TAX POLICIES WITH ENERGY POLICIES
- INSTRUMENTS TO PROMOTE RENEWABLE AND EFFICIENCY RESOURCES
- RECOMMENDATIONS FOR IMMEDIATE ACTION

Hawaii Energy Utility Regulation and Taxation

Selected Issues for Review and Discussion

IMPROVE THE EFFECTIVENESS AND EFFICIENCY OF REGULATION	34
Getting Policy Issues onto the PUC Agenda	32
Action: (PUC) Resolve Outstanding Dockets Addressing Energy Policy	33
Action: (PUC) Open Proceedings to Address Policy Matters	33
Action: (PUC, Governor) Create an Energy Policy Staff Within the PUC.....	34
Increase the Resources and Productivity of the Commission	35
Option: (Governor, Legislature) Increase Staff and Funding for the PUC.....	35
Option: (Legislature) Restrict Use of PUC Special Fund to Utility Regulation Only	39
Option: (Legislature) Take the PUC out from under B&F.....	39
Option: (Legislature) Reduce the Number of Activities That Are Regulated	39
Separate the Dual Roles of the DCA	41
Improving Public Access to the Regulatory Process	49
Access to Documents and Information	49
Access to the Hearings Process	55
Option: (PUC, Legislature) Create a System for Intervenor Compensation.....	55
Option: (PUC) Use Adequately Funded Collaboratives as Appropriate	58
Option: (PUC) Use Rulemaking Proceedings for General Policy Matters.....	59
GETTING THE INCENTIVES RIGHT IN RATE MAKING	60
Mitigate the Strategic Timing of Rate Applications by Utilities	61
Option: (PUC) Establish Periodic Rate Case Schedules for Each Utility	61
Reduce Existing Incentives for Utilities to Maintain High Sales Levels	62
Option: (PUC) Decouple Utility Profits from Sales Levels	62
Establish Progressive Standby Rates	65
Option: (Electric Utilities, PUC) Establish Progressive Standby Rates	66
Time-Sensitive pricing	71
Option: (PUC) Incorporate More Effective Time of Use Pricing	73
Fuel Cost Adjustment Mechanism	73
Option: (PUC) Differentiate Fuel Types in Fuel Cost Adjustments.....	75
Option: (PUC) Provide Partial Rather than Full Cost Adjustment	75
Levelized Rate making	75
Option: (Governor, Legislature) Provide Guidance to the PUC Regarding Geographic Levelization.....	78
Rate Making Test Year Conventions	82
Option: (PUC) Use Historical Rather than Future Test Year Period	82

EVALUATION AND SELECTION OF UTILITY RESOURCES - IRP	82
Improving Hawaii’s IRP Process	86
Action: (PUC) Determine Whether IRP Is to Be Implemented as a Regulatory Instrument....	86
Alternative: (PUC) Eliminate or Reduce IRP to a Simple Filing If it Is Not to Be Applied Effectively	86
Alternative: (PUC) Implement, Improve and Enforce the IRP Framework.....	86
Enforce and Implement Existing Provisions of the IRP Framework	87
Improve the Implementation of the IRP Process	91
Use Evaluation Methods and Criteria Fair to Renewable Resources	93
Legislative Options	100
Option: (Legislature) Require General or Specific Actions Regarding IRP.....	100
Option: (Legislature) Direct the PUC to Implement Renewable Portfolio Standards	100
 PROCUREMENT OF ENERGY RESOURCES	101
Level the Playing Field Between Utilities and Independent Power Producers	
Option: (PUC) Resolve PUC Docket No. 7310.....	104
Option: (PUC) Provide Standard Offer Contracts	106
Option: (PUC) Provide an Expedited Process for Resolving Formal Complaints.....	107
Action: (PUC) Require Utilities to Provide Avoided Cost Data	108
Establish a Formal Utility Resource Procurement Process	108
Option: (PUC) Establish a Competitive Bidding Process for New Wholesale Generation.....	108
 PROVIDE FOR THE NEEDS OF SPECIFIC RESOURCES	110
Energy Efficiency and Load Management Resources	110
Option: (PUC) Establish New Utility DSM Finance and Incentive Mechanisms	112
Option: (PUC, Legislature) Establish an Independent DSM Implementation Entity	112
Option: (PUC) Consider Competitive Bidding for DSM Services.....	113
Option: (Counties) Utility Permit Fees to Fund Energy Code Enforcement.....	113
Wind Generation Resources	113
Option: (Utilities, PUC, DCA) Provide Studies of Wind Resource Capacity	114
Option: (Legislature) Establish Wind Resource Development Zones.....	114
Option: (PUC) Provide Capacity Payments for Wind Resources as Appropriate	115
Distributed Generation Resources	115
Action: (PUC) Establish Clear Policies Regarding Distributed Generation.....	115

INSTRUMENTS TO PROMOTE RENEWABLE AND EFFICIENCY RESOURCES	132
Financial Incentive Instruments	132
Tax Credits	
Special Purpose Revenue Bonds	
Revolving Loan Programs	
Financial Penalty Instruments	133
Emission Fees	
Hookup Fees	
Taxation	
Mandate Instruments	134
Energy Codes or Standards	
Integrated Resource Planning (as a regulatory instrument)	
Renewable Set Asides	
Renewable Portfolio Standards	
Direct Financing Instruments	134
Government Renewable and Efficiency Projects	
System Benefit Charges	
Green Pricing	
ALTERNATIVE ENERGY UTILITY TAXATION APPROACHES	125
Option: (Legislature) Tax The Carbon, Not the Electricity	127
Option: (Legislature) Take Advantage of the State's Tax-Exempt Bonding Authority
