#### **Legislation 2008/Phase II**

This will be an energy year as far as legislation goes but will be tight since it is a supplemental budget. A copy of the final bill can be found at

#### **Brainstorming Data Needs and Benchmarks**

There was discussion on what we will do with the data we are seeking to generate once the additional funding is provided. An example of the data we need that is not available is the vehicle miles traveled. With this data, we could see the effect of gas prices, for example.

A subgroup within the working group may be the next step to zero in on what is needed with regards to data. If anyone is interested in participating on a subgroup, please let us know.

#### **Final Report**

A major part of the meeting was spent making changes to the report electronically while projecting the report on the screen at the front of the room.
